

The Handbook of Reading Research: A Comprehensive Guide to the Science of Reading

Reading is a complex cognitive process that involves the interaction of multiple cognitive, linguistic, and sociocultural factors. The Handbook of Reading Research (HRR) is a comprehensive and authoritative resource that provides a comprehensive overview of the science of reading. The HRR is a multi-volume work that is updated regularly to reflect the latest research findings.

The HRR is an essential resource for researchers, educators, and policymakers who are interested in the science of reading. The HRR can be used to inform research, teaching, and policy decisions about reading.

The HRR was first published in 1984. The HRR was edited by Patricia L. Anders, John J. Hoffman, and Richard P. Durkin. The HRR was published by the International Reading Association (IRA).
